Unique Products

An originator of new products and bespoke manufacturing solutions. Marblo is at the cutting edge of international design trends and technical advancements. All products proudly bearing the Marblo name, have been produced to exacting requirements, employing proprietary formula lions and production systems designed by the company.

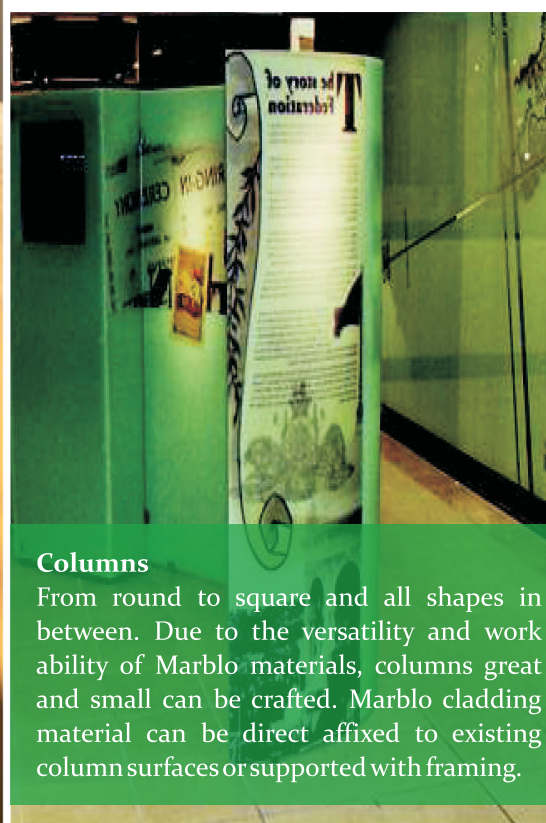

All Marblo products enjoy extended life-of-use permitting use on 5 Green Star Rated projects. Marblo can be easily repaired and refinished to its original condition, or reworked into new products, reducing demand for virgin materials and waste. Marblo Materials have LOW-VOC contend and are to we mitting and nontoxic.

Wall Cladding

Wall cladding featuring Marblo materials can add drama and or serviceability to commercial and domestic installations a like. Marblo materials are easy to clean and maintain. The materials can be lit from behind or clad directly to an existing wall.

Columns

From round to square and all shapes in between. Due to the versatility and work ability of Marblo materials, columns great and small can be crafted. Marblo cladding material can be direct affixed to existing column surfaces or supported with framing.

Table Tops

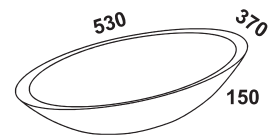

Versatility affords Marblo the opportunity to create table tops for multitude of environments. Historically, Marblo materials are specified for the materials durability, almost endless colour range, ability to be illuminated and to form complex designs and shapes, stain resistance, ease of cleaning and rejuvenation. In fact, the reasons for specifying Marblo table tops are almost as wide and varied their uses.

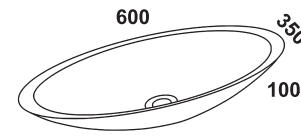

Bath Rooms

As a waterproof, easy to clean and highly stain resistant material, materials have graced residential, commercial and public area bathrooms alike.
